

August 2022

JOB OFFER: Textile Production Manager

PURPOSE & OVERALL RELEVANCE FOR THE ORGANISATION

- Realise large scale production of the developed textile fabrics from the R&D team
- Evaluate, coordinate, document and implement production strategies to create high quality textile products

KEY RESPONSIBILITIES

- Sourcing appropriate fibre and yarn according to selection from R&D and price specifications
- Identification and collaboration with production partners to realise final product
- Verification of Norms and certifications of suppliers and manufactures
- Visit production sights to support the launch of final product and ensure consistent quality
- Respond to changes and complications in the supply chain and production process through execution of appropriate solutions
- Proactively evaluate and find strategies how to optimise production processes
- Work independently on projects and follow up on project development in inter-disciplinary teams

QUALIFICATIONS: EDUCATION AND SKILLS

- Completed studies in Textile technology/management or similar qualification
- Proficiency in identification and classification in fibres and yarns
- Understanding of spinning and knitting technology
- Ability to work in interdisciplinary teams
- PC skills (MS Office programs, especially PowerPoint and Excel)
- Strong analytical skills, solution driven and result oriented
- Willing to travel
- Actively interested in technical textile
- Proficient in German and English (any other language is a plus)
